SOWETO

I wanna hold your hand

I wanna hold your hand
I wanna be your man
Please girl, can you see
You'll be happy with me

Another broken heart
Fallen down again
I must leave out
And carry on my way

My Mamma always said
Takes some flowers with you
To shines your better dresses
I thing is my last chance

Believe me I love you
My promises are truth
Oh Girl please don't go
No leave me all alone

News on market
In this morning
People say that you will come
You don't know
Bad things wait for you

Doesn't matter
If you have changed
Everybody know your name
Let me say
Please go away

Run Run it's your time,
Leave the gun and take your bag,
Another place different land
It looks for a new sun
Run Run it's your chance,
Leave the gun and take your bag,
Another place different land
You know,
Doesn't matter where you go

If you want
Is to remain here
As a fool in his last act
Can you see?
Bad things wait for you

Then you know
I become a believer
Believer of your religion
Yes I feel as burning fire
Inside deep of my soul
Feel like waking up
On the river

When I see you in the street
You look at another side
Now, I'm knocking in your door
But your mother gives me excuses
This night in the club
Your body dancing it made me shake
I am not going to desist
You are the girl make me believe

Then you know
I become a believer
Believer of your religion
Yes I feel as burning fire
Inside deep of my soul
Feel like waking up
On the river
